

Over 1,000,000

British Gas smart meters installed to date

By 2030

Government envision

50 million

smart meters installed

Time savings from not having to manually read and submit meter readings will be worth approx.

£ 1 7 2

million

between 2012 and 2030

The smart meter roll out will be worth:

£25.3 billion

Total economic benefit

£11.5 billion

National smart meter roll out cost

£14 billion

Net gain for Great Britain

Smart meters could lead to a
5% fall
in energy usage
across Britain

The average household would save approximately
£65
per year*

Energy suppliers will save
£10 billion
through tightening efficiency

Much of this will be passed onto customers via their bills

*based on the 5% reduction in energy usage calculated by Oxford Economics, given the average annual dual fuel bill of £1,310 according to Ofgem.
